Subheading

You can use Pages for both word processing and page layout. This newsletter template is set up for page layout, so you can manually rearrange pages and freely position text boxes, images, and other objects on the page.

In word processing documents, your text flows from one page to the next as you type, with new pages created automatically when you reach the end of a page. To create a word processing

document, choose a word processing template in the template chooser.

Column Title

You can layer objects, resize them, and place them anywhere on the page. To change how an object moves with text, select the object and then tap or click the Arrange tab in the Format controls.

- Pages detects that you're creating a list if you begin a sentence with a dash or with a number or letter followed by a period.

  - Use the Tab key to indent.

  - Use the Return key to add a new bullet.

- Press the Return key twice to end the bulleted list.
